This wide and varied range of Healthcare Seating Products has been created to compliment our extensive range of examination couches and specialist treatment tables that we supply throughout the UK Healthcare Industry and various overseas markets.

Many of these products are manufactured or part manufactured here on our premises and these items, together with selected factored products, provide a wide choice of healthcare seating solutions. These products provide high quality designs and features to benefit clinical and administrative staff as well as patients and visitors in various areas throughout the healthcare environment.

Most products are available with a wide colour choice of antimicrobial vinyl which is easy to clean and disinfect and is fire retardant to European Standard - BS5852 Ignition Source 5 - Crib 5. Some products also provide the option to have fabric upholstery coverings as an alternative to vinyl. Many of the products carry a 5-year warranty, fully supported by Plinth Medical's after sales service and back-up, all of which is a major benefit when purchasing this equipment.

PREMIUM
SADDLE CHAIRS

Used in a wide range of medical environments where clinical staff are sitting for long periods, the design of these chairs promotes corrective posture when seated and the option of the backrest provides even further support when sitting for long periods. The chair has seat tilt facility for added comfort and positioning and the high models have the option of a fitted foot support ring. The foot height control option provides the additional benefit of “hands-free” height operation.

PREMIUM SONOGRAPHY STOOLS

This stool has been specifically designed to enable the clinician, primarily a sonographer, to position themselves as close to the patient as possible as they carry out scanning procedures. The shape of the stool top and the compact base of only 53cm diameter, maximises legroom and clinical access and the all-around ring release lever ensures that the stools height can be operated quickly and easily. The foot height control option provides “hands-free” height operation to further assist these types of procedures.

Model 1028

Model 1124 Foot Support Ring
Model 1122 Anti-Static Castors
Model 1121 Load Locking Castors
PREMIUM SONOGRAPHY CHAIRS

Just like the stools, the chair seat has been specifically designed to enable the sonographer to position themselves as close to the patient as possible during scanning procedures. The chair seat and backrest sections have synchronised tilt facilities which enable the operator to control and set the angle of backrest and seat tilt with one hand via a single control lever. The additional benefit of the optional foot height control provides “hands-free” chair height operation.

Model 1030
Premium Sonography Chair - Standard
Height Range 48-59cm

Model 1031
Premium Sonography Chair - High Version
Height Range 57-74cm
Foot support ring fitted

Healthcare Seating Solutions - 17
HARRIS CLINIC CHAIRS

This high quality Clinic Chair features a contoured seat and backrest. The backrest has spring-loaded angular adjustment and is fully height adjustable in 7 different positions. The chair also provides seat tilt adjustment and there is the option of having foot height control which provides the benefit of “hands-free” height operation. A multi-positional arm support option can be added for stabilising the arms and hands during minor ops.

- Model 1124 Foot Support Ring
HARRIS SUPPORT CHAIRS

These chairs feature a very supportive bowl-shaped seat and sculptured backrest to support the shoulders and back. The free-float functionality of the design makes the seat and backrest follow the user’s movements, therefore providing great comfort throughout lengthy seated procedures. With the single lever asynchronous mechanism the seat and back support move independently from each other and, once positioned, will both lock simultaneously when activated. The option of a foot height control provides the benefit of “hands-free” height operation.

HARRIS ADVANCED SADDLE STOOLS

These Advanced Saddle Stools promote good seating posture and help to alleviate fatigue and prevent injury. The compact design provides maximum legroom for the user as well as improved movement on restricted surfaces. Designed specifically for the male anatomy, the stool seat is soft with a wider surface and special zones to minimise uncomfortable pressure when sitting for long periods. Additionally, the Advanced Plus model has a free float function, activating muscles in the lower back and abdomen.

See page 39 for vinyl upholstery colours
The Somersham Electric Patient recliner is a compact and space saving tilt in space recliner, ergonomically designed to accommodate most body shapes. Pressure-reducing cushions evenly distribute body weight, increase patient comfort and may reduce the risk of pressure ulcers. Additionally, the “tilt in space” facility reduces shear and friction and maximises patient comfort and support. The dual motor operation provides a stand to sit function for added safety with independent backrest positioning. Ideal for patients requiring lengthy spells of recovery or relaxation in a reclined position such as dialysis, etc.

Model 1110
Somersham Electric Patient Recliner
H 790mm, Seat Height 460mm, D 680mm, W 1080mm

Options
Fabric coverings - information available on request. See page 39 for vinyl upholstery colours.
The Brockford Bariatric Patient Recliner has been specifically designed to accommodate very heavy patients with a safe working load of 260kgs (40 st), and with leg lift capability of 140kgs (22 st). Higher load ratings are also available on request. Ergonomically designed to accommodate most body shapes, the design provides maximum patient support, safety and comfort. Pressure-reducing cushions evenly distribute body weight, increase patient comfort and may reduce the risk of pressure ulcers. The powered leg lift increases circulation and may reduce under shearing during lifting operation.

Model 1111
Brockford Bariatric Patient Recliner
H 790mm, Seat Height 460mm, D 680mm, W 1080mm
FIXED HEIGHT PHLEBOTOMY CHAIR

This compact Fixed Height Phlebotomy Chair is ideal for use in small clinics or surgeries. The chair is supplied with a sculptured armrest to fully support the patients arm during phlebotomy procedures. The arm support can be used on either side of the chair and has both height and angular adjustment to ensure optimum positioning during these procedures.

RECLINING PHLEBOTOMY CHAIR

This compact and manually adjustable chair features synchronised adjustment of the backrest and foot section angles which enables quick Trendelenburg positioning should the patient faint or need the recovery position. The chair is supplied with braked castors or fixed feet and is supplied with 2 sculptured armrests to fully support the patients arm during phlebotomy procedures. The armrests are PU-moulded and easy to clean and have both height and angular adjustment to ensure optimum positioning during these procedures.

All Plinth Medical products are upholstered as standard using the “Just Colour” range of contract vinyl from Chieftain Fabrics. We strongly recommend this vinyl range which we have selected for its hard-wearing and longevity benefits, as well as being antimicrobial and fire retardant to Crib 5. The vinyl is easy to clean and disinfect and is available in a very wide choice of colours.
